

Expanded Metal – Product Data Sheet

Mesh Ref No: 03-27

Raised Stainless Steel Mesh

LW Pitch:	3.00mm	Strand Width:	0.40mm
SW Pitch:	1.81mm	Thickness:	0.20mm
Weight:	0.71 kg / m ²	Open Area:	56%

Material: Stainless Steel Grade 304 to BS EN 1.4301
Coil Size: 100mm, 150mm and 500mm wide, sold by the metre.

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
