

Expanded Metal – Product Data Sheet

Mesh Ref No: 12-96WA

Raised Aluminium Walkway Mesh

LW Pitch: 121.92mm
SW Pitch: 33.84mm
Weight: 5.06 kg / m²

Strand Width: 6.35mm
Thickness: 5.00mm
Open Area: 63%

Material: Aluminium Grade 1050 H14
Sheet Size: 2500mm LWD x 1250mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
