

## Expanded Metal – Product Data Sheet

Mesh Ref No: 19-94SF

Flattened Stainless Steel Mesh

LW Aperture:	14.22mm	Strand Width:	1.80mm
SW Aperture:	4.80mm	Thickness:	0.90mm
Weight:	3.01 kg / m <sup>2</sup>	Open Area:	57%

Material:	Stainless Steel – Grade 304 to BS EN 1.4301
Sheet Size:	1000mm LWD x 2000mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
