

## Expanded Metal – Product Data Sheet

Mesh Ref No: 38-97

Raised Mild Steel Mesh

LW Pitch:	38.10mm	Strand Width:	2.25mm
SW Pitch:	16.48mm	Thickness:	1.50mm
Weight:	3.43 kg / m <sup>2</sup>	Open Area:	73%

Material:	Mild Steel – Cold Reduced DC01 to BS EN 10130
Sheet Size:	2440mm LWD x 1220mm SWD

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
