Raised Aluminium Mesh

LW Pitch: 50.80mm
SW Pitch: 24.00mm
Weight: 2.16 kg / m²

Strand Width: 8.00mm
Thickness: 1.20mm
Open Area: 31%

Sheet Size: 1250mm LWD x 2500mm SWD

Material: Aluminium – Grade 1050 H14.

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
