Weight:	6.64 kg / m <sup>2</sup>	Open Area:	6%

Sheet Size: 625mm LWD x 1250mm SWD. Custom sizes up to 675mm LWD.

Material: Mild Steel – Cold Reduced DC01 to BS EN 10130.  
Aluminium – Grade 1050 H14.

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process.  
Additional specification variations are available, please contact us for more information.
