

## Expanded Metal – Product Data Sheet – Designer Mesh

**Mesh Ref No:** PACQUIAO

**Raised Mild Steel Mesh**

**LW Pitch:** 121.92mm  
**SW Pitch:** 31.65mm  
**Weight:** 5.29 kg / m<sup>2</sup>

**Strand Width:** 3.50mm  
**Thickness:** 3.00mm  
**Open Area:** 78%

**Sheet Size:** 2440mm LWD x 1220mm SWD

**Material:** Mild Steel – Cold Reduced DC01 to BS EN 10130.  
Pre Galvanised Steel - DX51D +Z, Aluminium – Grade 1050 H14.

All expanded metal products are manufactured from a single piece of raw material and are created as a continuous mesh with no joints or loose strands. The finished product has a greater strength to weight ratio than the un-expanded parent material. Available in sheets or coil form (certain products only). Expanded metal by its very nature is a green product with almost no wastage arising from the manufacturing process. Additional specification variations are available, please contact us for more information.
